

Ecolo's ACU 53 System integrates dependable solid state electronics and durable, oilless compressors into one sleek and refined package. The ACU 53 system is specially designed to control multiple zones with **XStreme™ Vapor Units** in different locations. The water-free particles of **XStreme™ Vapor Solutions** are able to easily mix and collide with malodor molecules in columns of air associated with fan or vent exhaust.

Features and Benefits:

- All-in-one Controller Design
- Independently Controlled Multi-Zone Operations
- Adjustable Programming for Volume Control
- Air Flow Sensor (optional)
- Waterless Solutions
- Operational in Cold Climates
- Tamper Proof Enclosure
- Easy to Install

The ACU 53 Vapor Delivery System is specifically designed for marijuana greenhouse growing operations.

- Fan Exhaust
- Exhaust Stacks
- Storage Areas
- Loading Docks

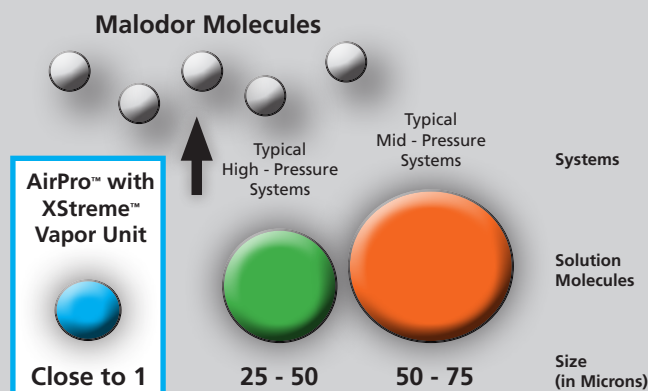

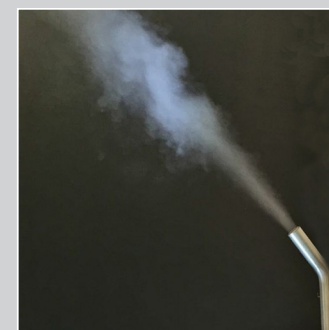

Product Specifications:

Dimensions: 38.1 x 26.7 x 26.1cm/ 15" x 10.5" x 10.25"
Weight: 18.14 kg /40lb
Electrical: 110/115 volts, 60Hz, 4.8/3.3 amps
220/230 volts, 50Hz, 1.6/1.5 amps
Vandal resistant 18 gauge lockable steel cabinet.

Vapor Is Better Than Misting:

Compared to conventional misting, the high concentration of the ultra-light XStreme™ Solution particles increases the opportunity for collision and absorption of the malodor molecules.
