

www.ecolo.com | *The Leader in Odor Control for 40+ years*

Brand History

In the 1960's and 1970's, economies worldwide were developing rapidly and the resulting environmental pollution was becoming more of an issue. Large amounts of waste and sewage were generated, disrupting communities with unpleasant odors. Ever since, environmental scientists and entrepreneurs have sought odor control solutions with environmental protection in mind. Calvin Sager, Ecolo's founder, decided to find safe, environmentally-friendly and effective solutions to industrial and waste odor problems. After 18 months of countless experiments, comparisons, and practical applications, the Ecolo team created its first odor control formulation. Designed to be a superior odor counteractant while respecting the environment, this original formulation became the basis of Ecolo's commitment to environmentally-friendly odor control.

**ODOR CONTROL
MADE FOR A BETTER FUTURE.**

Made in Canada Committed to the World

ECOLO

ABOUT US

For over 40 years, Ecolo has been an industry leader in innovative odor control technologies. Through years of continuous R&D and acquisitions, Ecolo proudly offers the industry's most comprehensive line of proprietary formulations sold to over 40 countries across multiple market segments. Our ISO certified facility produces solutions such as air atomization, waterless vapor, and biochemical booster concentrates which eliminate odors at the source. Ecolo's inhouse engineers have developed the latest equipment including pneumatic and hydraulic delivery systems, vapor delivery systems, and portable oscillating vapor cannons designed exclusively for complex odor challenges.

We respect the environment and pay attention to nature. We embrace cultural diversity and welcome world-class talents to fulfill our one common goal to the world – safe and effective environmental odor control.

Recycling

AirSolution™ formulations are water-soluble concentrates that incorporate a complex proprietary blend of active botanical extracts and powerful odor neutralizing agents. When the diluted AirSolution is misted in contact with odorous air, the active counteractions effectively neutralize airborne malodors.

BioStreme® concentrates, through engineered formulations of optimized essential nutrients, have been specifically developed to enhance growth and reproduction of beneficial indigenous bacteria. These proprietary formulas consist of micronutrients, amino acids, and complex organic extracts: the building blocks for growth and synthesis of new cell material. With BioStreme, effective management of virtually any biological treatment process can be achieved and/or enhanced, providing accelerated decomposition and stabilization rates while repressing odor-producing biological processes. Safe & biodegradable, BioStreme increases treatment efficiency and delivers operational cost savings.

XStreme® Waterless Odor Neutralizers

XStreme® Vapor Solutions contain industry-proven odor elimination technology common to Ecolo's AirSolution™ line, but are ready-to-use. Highly concentrated and waterless, these powerful neutralizing solutions include a complex blend of proprietary ingredients, specifically designed to function in below-freezing temperatures to combat malodors all year round. Compared to conventional misting, these ultra-light particles can easily disperse throughout all parts of an enclosed space, for a more uniform coverage and intensity.

AIRSENSORY Premium Air Care Solutions

Applications

HVAC Systems

Hotels

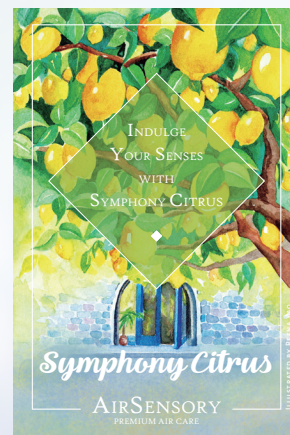

Offices

Common Areas

Taking care of the ambient air in one go, AirSensory premium air care solutions use patented odor-neutralizing technology paired with botanical extracts, leaving you with a clean and pleasant sensory experience.

AirSensory solutions are effective, concentrated and waterless, for easy year-round use. Discover AirSensory's Luxe Collection today.

DISTRIBUTOR SUPPORT

Backed with impressive scientific capabilities and years of experience, Ecolo provides a fully-integrated product line for best-in-class odor control solutions. With over 60 proprietary formulations, covering multiple market segments, Ecolo distributors have the ability to focus on providing the right solutions for clients, while earning valuable rebates. Inquire today about becoming an Ecolo distributor to start enjoying high customer satisfaction rates and benefiting from continuous investment returns.

APPLICATIONS

Municipal: Landfills, Transfer Stations, Wastewater Treatment Plants, Composting

Industrial: Chemical Plants, Dyeing, Paint, Food Processing, Pulp and Paper

Agricultural: Animal husbandry, Slaughterhouses, Farming, Greenhouses

Commercial: Shopping Malls, Hotels, Restaurants

Residential: Condo & Apartment Buildings, Nursing & Retirement Homes

**Providing industry-proven
odor control solutions
for clients all over the world.**
